

FIGURES DO NOT LIE

YOU WOULD HAVE MADE A LOT OF MONEY HAD YOU BOUGHT

Honolulu Oil at - 75 cents which is now selling at \$3.50
 Engels Copper at - 25 cents which is now selling at \$2.95
 Mountain King at - 10 cents which is now selling at \$1.10
 Mineral Products at 25 cents which is now selling at .95

If you did not buy these when you had the chance you have yourself to blame

If you have missed previous chances, do not overlook the next good opportunity

Buy Gold Road Bonanza now at 25c

THE GOLD ROAD BONANZA MINING COMPANY owns about 90 acres, comprising 5 claims in the celebrated Oatman District, Arizona.

It is situated in the heart of the Proven Zone, directly south and adjoining the well known Gold Road Mines Co. This property is owned and controlled by the United States Smelting and Refining Company and is on record as being the Largest Producer in the entire Oatman District. It is reported that the actual monthly production is about \$250,000.

The property of THE GOLD ROAD BONANZA is traversed by an immense vein identical in appearance and parallel to the Gold Road Vein at a distance of about 400 feet.

Complete equipment is on the ground at the present time and is in full operation.

There are three shifts working and the main shaft has advanced beyond the 100-foot depth.

The work on this shaft is progressing at the rate of about 5 feet per day; and the opinions previously expressed by prominent and experienced mining engineers, in their reports on this property, have so far been fully substantiated.

IN MAKING COMPARISONS AT THIS PARTICULAR STAGE OF DEVELOPMENT BETWEEN THE NATURE OF ORE ENCOUNTERED IN THE GOLD ROAD BONANZA WITH THAT OF THE SAME LEVEL OF THE GREAT PRODUCING MINES, THE CONCLUSION IS THAT A LARGE AND PAYING ORE BODY WILL BE REACHED AT A COMPARATIVELY EARLY DATE.

The management is in the hands of men of undisputed integrity and ability, assuring the stockholders every possible safeguard and protection. The president is Mr. Frank T. Torpey, a capitalist and well known mining expert; the vice president is Mr. W. B. Ross, who now occupies the position of superintendent of the Gold Road Mines Company; the secretary is Mr. W. P. DeWolf, retired merchant.

The Gold Road Bonanza Mining Company is incorporated under the laws of the State of Arizona. Capital 1,000,000 shares, par value \$1.00 each, non-assessable.

BANNER SEASON FOR SUGAR ON MAUI EXPECTED

[Special Star-Bulletin Correspondence]

WAILUKU, Maui, May 11.—While heavy damage is reported from the plantations along the Hamakua coast, on the Island of Hawaii, from storm, Maui has been peculiarly fortunate. Practically every plantation on the island has profited immensely from the rain, and although it has in some instances interfered to some extent with field work, this has been offset many times over by the benefit to crops.

On west Maui, while the precipitation on the lower levels has been light, and have not interfered in any way with harvesting or other field work, the mountains have been almost constantly saturated by heavy downpours, with the result that the Pioneer and Olowalu companies have had a great abundance of irrigation water, and have not been obliged to pump for some time. Unless some unfore-

seen disaster occurs this seems destined to be Maui's record year in the sugar industry.

Some uneasiness is being expressed among the pineapple growers of the Haiku district over the persistently rainy weather of the past few weeks, which have put the roads in bad condition. The heavy canning season opens within a few weeks, and should the wet weather continue, large losses will be inevitable from inability to haul fruit promptly.

M'KINLEY BEATS PUNAHOU BY SWATTING THAT BALL

A great man once said that you should never total your poultry stock until they are all on the ground, and this may apply to Punahou, as yesterday afternoon on Alexander field the Buff and Blue were leading the stalwarts from McKinley by a score of 2 to 1 in the seventh inning.

After this inning had passed away the hopes of the Punahou team fled, as the McKinley swatmen proceeded to garner a bundle of hits, and as a result secured six runs for a total score of seven to four for their opponents, Punahou having landed two in the ninth.

Peterson was on the firing line for the Punahou squad, and to the credit of this slasher it may be said that he pitched good ball, but his team-

mates allowed the gates to open and 11 errors were chalked up during the melee. Ross for McKinley pitched good ball up to the ninth, when he weakened, allowing two runs. From the showing made today by the teams it appears as if St. Louis will have a good chance for the title.

Punahou's batting was better yesterday. They gleaned a total of nine hits from Ross, whereas McKinley found Peterson for only six, most of which were really due to inefficient fielding.

Punahou faces a hard game Monday, when Kam and Punahou battle on Alexander Field.

The score yesterday:

	R	H	E
Punahou	4	9	13
McKinley	7	6	5

Runs by innings:
 Punahou 0 0 0 1 0 1 0 2 - 4
 McKinley 0 0 0 0 1 0 6 - 7

HOMEMADE DUM DUM BULLETS FOUND IN EX-SOLDIER'S PISTOL

Dum-dum bullets are being manufactured in Honolulu. In very small quantities, 'tis true, but regular dum-dummers at that.

George Lewis, an ex-soldier, was arrested at the public bath houses on Waikiki yesterday for carrying con-

cealed weapons. He admitted his guilt and was fined \$20 in police court this morning.

Not only did Lewis have in his possession an enormous "gat" of the frontier model Colt and the time honored .45 caliber, but also several cartridges, the bullets of which had been cross-cut with a knife, making regular dum-dums of the deadliest type.

Lewis told the court that he carried the six-shooter out to the beach, expecting to do target practice after a swim; that he did not know the bullets were dum-dums and had unwittingly cut them with his knife, and that he left the pistol in the office when he went in bathing. He said he was employed by the Hawaiian Electric Co.

"Any ex-soldier ought to know what a dum-dum bullet is," Prosecutor Chillingworth informed the court. "It is the deadliest kind of a projectile and tears a hole the size of your head. Furthermore, satisfactory target prac-

tise can not be had with this style of bullet."

The prosecution stated further that there was a rumor that Lewis had had some trouble and had been carrying the pistol for several days, on a lookout for his enemies.

Y. W. C. A. SECRETARIES TO REACH HERE FROM MAINLAND TUESDAY

Miss Lillian Jones and Miss Anna K. Brewer, Y. W. C. A. secretaries in the California field, will arrive in Honolulu on the Manoa Tuesday morning. Miss Jones is executive secretary of the Pacific Coast field, and is closely identified with all work in the Association world.

Miss Brewer is at present a member of the association committee, and has been active in promotion work. This will be the first visit of any of the Association secretaries as a representative of the Western field. Last

December the local Association was made a member of the organization with headquarters on the coast, and the local staff have been waiting with interest for the coming of the coast workers.

The membership in the local Association has increased 50 per cent since the first of the year, and as a result a number of policies that have been in effect may have to be changed to meet the new conditions. It is expected that the visiting secretaries will establish an advisory policy for the local Association.

PAROLED CONVICT IS ONCE MORE CONVICTED

Vanito Ramos, a Porto Rican, and Isidoro Arsenal, a Filipino, were found guilty in police court this morning of assault and robbery and given one year each. They were charged with knocking down Marco Perez in Iwilei May 4 and taking \$16 from him. Perez

works for the Mutual Telephone Co. Ramos has served two years in prison and was out on parole. Arsenal was up for robbery about a month ago but the charge was withdrawn. Both defendants were broke before the robbery but had several dollars when searched at the jail directly afterwards. Stickers in their clothing similar to those acquired by Perez when he fell to the ground from the blow, were the cause of the defendants' arrest.

Spain has removed the embargo on articles partly or wholly made of copper or brass.

Clarence Rathbone, who served with Admiral Farragut in the Civil War, died at Albany, N. Y.

Langley discovered sun variations. Seventy per cent of the American people use electricity in some form every day.
